

AutoLocker stations provide 24-hour access to high value, oversized, calibrated and durable items using solenoid activated lockers and a simple to use keypad interface. Individual lockers are available in eight different sizes that can be mixed and matched to fit your specific needs. Windows, let you visually see where items are. The lockers can be programmed to deny access to any gage that has exceeded its calibration threshold. Calibration recall can be based upon the first occurrence of a calibration date, number of days on floor or the number of cycles it has run. Optional features include the addition of network connections and AC power outlets. This allows users to keep rechargeable tools, digital gages, and laptop PCs updated and charged in a secure “check out” and “check in” environment. Stop the loss of expensive power tools, gages and test kits.

HOW IT WORKS

Login. Employees access the AutoLocker by using their employee badge or employee number.

Select item. Users then enters the locker number, or scans a barcode on the pick sheet or selects the item from the RoboCrib screen.

Dispense. The appropriate locker door will automatically open.

Optional: A PIN can also be required as well as prompts to track overhead data like department number, job number, customer number, tail number, etc. AutoLockers can also deny access to any gages that have fallen out of calibration.

Returns. The employee badges in, presses the return button, and returns the item. Closing the door completes the transaction. For gage returns the user will be prompted for the number of cycles.

FEATURES

- Available 24-7 with security and accountability
- Keypad standard - 12.1 in. (307.3 mm) touchscreen is optional
- Handheld barcode scanner - quickly issue items with pick sheets
- Ability to force the use of reconditioned items first
- Complete serialized calibration control
- FOD (foreign object debris) control - prevent FOD in military, aerospace, and high - level control environments
- Lot and expiration date tracking - advanced monitoring for lot and expiration dates
- Full user access support - supports proximity cards, key fobs, mag-stripe cards, barcodes, keypad/PINs
- Multilingual - support for other languages
- Access control by item, budget, job and employee shift
- 12-month warranty

SOFTWARE

- Over 200 standard reports
- AutoCrib.net or client-server - cloud-managed services or secured internal network
- EDI - advanced ship notices (ASN) via EDI
- ERP system support - Interface with many popular ERP systems (SAP, JDE, Baan, etc.)
- Alerts - get inventory alerts, and send email reports to any smartphone, tablet, or computer
- Seamlessly connect - use it with existing AutoCrib systems or use it as a standalone system

in. (H x W x D)	mm (H x W x D)
